- Disposal/Reuse**
Do not dispose of this battery in the trash. Recycle it properly. Do not incinerate or burn. Do not short circuit or damage the battery. Do not use a battery that is damaged or leaking.
- Do not use in high-temperature environments.** Do not use in environments where the temperature exceeds 125°F (50°C). Do not use in environments where the battery is exposed to direct sunlight or other heat sources.
- Do not use in high-voltage environments.** Do not use in environments where the voltage exceeds 12V. Do not use in environments where the battery is exposed to high-voltage electrical fields.
- Do not use in high-current environments.** Do not use in environments where the current exceeds 10A. Do not use in environments where the battery is exposed to high-current electrical loads.
- Do not use in high-frequency environments.** Do not use in environments where the frequency exceeds 100kHz. Do not use in environments where the battery is exposed to high-frequency electromagnetic fields.
- Do not use in high-vibration environments.** Do not use in environments where the vibration exceeds 10g. Do not use in environments where the battery is exposed to high-vibration mechanical loads.
- Do not use in high-impact environments.** Do not use in environments where the impact exceeds 10ft-lb. Do not use in environments where the battery is exposed to high-impact mechanical loads.
- Do not use in high-pressure environments.** Do not use in environments where the pressure exceeds 10psi. Do not use in environments where the battery is exposed to high-pressure mechanical loads.
- Do not use in high-humidity environments.** Do not use in environments where the humidity exceeds 90%. Do not use in environments where the battery is exposed to high-humidity conditions.
- Do not use in high-salt environments.** Do not use in environments where the salt concentration exceeds 10%. Do not use in environments where the battery is exposed to high-salt conditions.
- Do not use in high-pollution environments.** Do not use in environments where the pollution level exceeds 10ppm. Do not use in environments where the battery is exposed to high-pollution conditions.
- Do not use in high-radiation environments.** Do not use in environments where the radiation level exceeds 10mSv/h. Do not use in environments where the battery is exposed to high-radiation conditions.
- Do not use in high-magnetic environments.** Do not use in environments where the magnetic field exceeds 10mT. Do not use in environments where the battery is exposed to high-magnetic fields.
- Do not use in high-acoustic environments.** Do not use in environments where the acoustic pressure exceeds 10psi. Do not use in environments where the battery is exposed to high-acoustic loads.
- Do not use in high-velocity environments.** Do not use in environments where the velocity exceeds 100ft/s. Do not use in environments where the battery is exposed to high-velocity mechanical loads.
- Do not use in high-temperature environments.** Do not use in environments where the temperature exceeds 125°F (50°C). Do not use in environments where the battery is exposed to high-temperature conditions.
- Do not use in high-voltage environments.** Do not use in environments where the voltage exceeds 12V. Do not use in environments where the battery is exposed to high-voltage electrical fields.
- Do not use in high-current environments.** Do not use in environments where the current exceeds 10A. Do not use in environments where the battery is exposed to high-current electrical loads.
- Do not use in high-frequency environments.** Do not use in environments where the frequency exceeds 100kHz. Do not use in environments where the battery is exposed to high-frequency electromagnetic fields.
- Do not use in high-vibration environments.** Do not use in environments where the vibration exceeds 10g. Do not use in environments where the battery is exposed to high-vibration mechanical loads.
- Do not use in high-impact environments.** Do not use in environments where the impact exceeds 10ft-lb. Do not use in environments where the battery is exposed to high-impact mechanical loads.
- Do not use in high-pressure environments.** Do not use in environments where the pressure exceeds 10psi. Do not use in environments where the battery is exposed to high-pressure mechanical loads.
- Do not use in high-humidity environments.** Do not use in environments where the humidity exceeds 90%. Do not use in environments where the battery is exposed to high-humidity conditions.
- Do not use in high-salt environments.** Do not use in environments where the salt concentration exceeds 10%. Do not use in environments where the battery is exposed to high-salt conditions.
- Do not use in high-pollution environments.** Do not use in environments where the pollution level exceeds 10ppm. Do not use in environments where the battery is exposed to high-pollution conditions.
- Do not use in high-radiation environments.** Do not use in environments where the radiation level exceeds 10mSv/h. Do not use in environments where the battery is exposed to high-radiation conditions.
- Do not use in high-magnetic environments.** Do not use in environments where the magnetic field exceeds 10mT. Do not use in environments where the battery is exposed to high-magnetic fields.
- Do not use in high-acoustic environments.** Do not use in environments where the acoustic pressure exceeds 10psi. Do not use in environments where the battery is exposed to high-acoustic loads.
- Do not use in high-velocity environments.** Do not use in environments where the velocity exceeds 100ft/s. Do not use in environments where the battery is exposed to high-velocity mechanical loads.
